psychology and philosophy have long studied the nature and role of explanation more recently artificial intelligence research has developed promising theories of how explanation facilitates learning and generalization by using explanations to guide learning explanation based methods allow reliable learning of new concepts in complex situations often from observing a single example the author of this volume however argues that explanation based learning research has neglected key issues in explanation construction and evaluation by examining the issues in the context of a story understanding system that explains novel events in news stories the author shows that the standard assumptions do not apply to complex real world domains an alternative theory is presented one that demonstrates that context involving both explainer beliefs and goals is crucial in deciding an explanation's goodness and that a theory of the

possible contexts can be used to determine which explanations are appropriate this important view is demonstrated with examples of the performance of acceptor a computer system for story understanding anomaly detection and explanation evaluation

when the first volume of the dog trainer's resource was published in 2007 it became a resounding success among professional dog trainers and behaviorists it also introduced a new generation of dog trainers to the profession and started them on the road to success with information from experts in the field this new volume the dog trainer's resource 2 contains more cutting edge information collected from dog training's most influential magazine the apdt chronicle of the dog published by the association of pet dog trainers subjects covered in this book range from puppy training and socialization to working with veterinarians and how to run the business end of the leash a special emphasis in this volume is on behavior problems including how to diagnose problem behaviors training and management strategies it includes detailed case studies that give the reader insights from experts both new and seasoned dog trainers will benefit from the 73 articles written by 43 authors

more than a decade has passed since the first international conference of the learning sciences icls was held at northwestern university in 1991 the conference has now become an established place for researchers to gather the 2004 meeting is the first under the official sponsorship of the international society of the learning sciences isls the theme of this conference is embracing diversity in the learning sciences as a field the learning sciences have always drawn from a diverse set of disciplines to study learning in an array of settings psychology cognitive science anthropology and artificial intelligence have all contributed to the development of methodologies to study learning in schools museums and organizations as the field grows however it increasingly recognizes the challenges to studying and changing learning environments across levels in complex social systems this demands attention to new kinds of diversity in who what and how we study and to the issues raised to develop coherent accounts of how learning occurs ranging from schools to families and across all levels of formal schooling from pre school through higher education this ideology can be supported in a multitude of social contexts the papers in these conference proceedings respond to the call

the first edition of robotic surgery was written only a decade after the introduction of robotic technology it was the first comprehensive robotic surgery reference and represented the early pioneering look ahead to the future of surgery building upon its success this successor edition serves as a complete multi specialty sourcebook for robotic surgery it seeks to explore an in depth look into surgical robotics and remote technologies leading to the goal of achieving the benefits of traditional surgery with the least disruption to the normal functions of the human body written by experts in the field chapters cover the fundamental principles of robotic surgery and provide clear instruction on their clinical application and long term results most notably one chapter on the blueprint for the establishment of a successful robotic surgery program lessons from admiral hymen rickover and the nuclear navy outlines the many valuable lessons from the transformative change which was brought about by the introduction of nuclear

technology into the conventional navy with safety as the singular goal of the change process robotics represents a monumental triumph of surgical technology undoubtedly the safety of the patient will be the ultimate determinant of its success the second edition of robotic surgery aims to erase the artificial boundaries of specialization based on regional anatomy and serves as a comprehensive multispecialty reference for all robot surgeons it allows them to contemplate crossing boundaries which are historically defined by traditional open surgery
