the life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain states to retain and use existing chemical weapons as well as increase state interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in iraq and syria and also in more targeted chemical assassination operations in malaysia and the uk using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse the book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the chemical weapons convention in preventing the development and use of chemical weapons through the employment of a novel holistic arms control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse a particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with states to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

it is now commonly asserted that climate change will fundamentally change international relations it has been predicted that global warming will increase conflict within and between states intensify food insecurity menace the global trading system and unleash waves of migration as a result governments are beginning to incorporate these warnings into their foreign policy initiatives the appropriateness of their incipient responses needs to be examined in finer detail this book looks at the impact of climate change on european union eu security policy it explores how governments are reconfiguring their geo strategy and broader international relations in the wake of climate change warnings the book demonstrates that although many aspects of eu foreign policies have begun to change climate security is not yet accorded unequivocal or sufficient priority in doing so youngs argues that if climate change policies are to have significant effect they can no longer be treated as a separate area of policy but must be incorporated into the more mainstream debates pertinent to eu common foreign and security policy cfsp this book will be of key interest to students scholars and practitioners of climate change and policy energy and environmental policy eu governance and foreign policy european studies international relations geography security studies policy and environmental economics
